SUMMARY

Enthusiastic B.Tech graduate in Computer Science & Information Technology with hands-on experience in Python, Natural Language Processing (NLP), and AI-powered applications. Experienced in building transformer-based sentiment analysis and text summarization solutions, with practical exposure to Generative AI, multimodal learning, and modern machine learning workflows.

SKILLS

Python · JavaScript · NLP · Machine Learning · Generative AI · RAG · Deep Learning · Sentiment Analysis · Transformer Models (DistilBERT, XLNet) · Data Preprocessing · Tokenization · Feature Engineering · Model Fine-tuning · Model Evaluation · Multimodal Learning · Multimodal Data Fusion · MongoDB · SQL · Microsoft Excel · Power BI · HTML · CSS · Bootstrap · Git · GitHub · Jupyter Notebook · VS Code · REST API · Backend Development · Problem Solving

EXPERIENCE

Data Analytics Intern — Proxenix | Mar 2025 – Jul 2025 | Cuttack, Odisha

- Applied Python-based NLP models to real-world data analytics case studies, extracting meaningful insights from large datasets.
- Developed and tested NLP preprocessing pipelines covering data cleaning, tokenization, and feature engineering.
- Collaborated with team members to analyse datasets and present findings in a professional team environment.

Generative AI Workshop — Freedom With AI | Aug 2025 – Sep 2025 | Cuttack, Odisha

- Worked with generative AI models including GPT, Stable Diffusion, and DALL-E for domain-specific applications.
- Experimented with hyperparameters and dataset customization strategies to improve model performance and output quality.
- Gained end-to-end exposure to dataset preparation, model selection, evaluation, and iterative refinement.

PROJECTS

Real-Life Text Summariser | Python · NLP · Gradio

- Developed an end-to-end text summarization application using Python and NLP techniques.
- Implemented preprocessing workflows including tokenization, stop-word removal, and text normalization.
- Integrated a Gradio interface for real-time text summarization while preserving important contextual information.

Multimodal Sentiment Analyser | Python · NLP · Deep Learning

- Engineered a multimodal sentiment analysis system processing text, audio, and visual data using transformer-based architectures.
- Designed a data ingestion and fusion pipeline combining modality-specific encoders into a unified classification framework.
- Improved sentiment prediction through feature extraction and multimodal data fusion across heterogeneous inputs.

EDUCATION

B.Tech, Computer Science & Information Technology | C.V. Raman Global University, Bhubaneswar, Odisha
Oct 2022 – Jun 2026 | CGPA: 8.19/10

Secondary & Senior Secondary Education | DAV Public School, Cuttack, Odisha
Apr 2019 – Jul 2022 | Class XII: 83% | Class X: 94.6%

AWARDS & CERTIFICATIONS

- UI/UX Certification by Google — September 2024: Completed certification covering foundational user interface and user experience design principles and modern design practices.
- Cybersecurity Fundamentals — IBM SkillsBuild, March 2025: Completed certification covering essential cybersecurity concepts, online safety, and threat protection.
